Non-oil Foreign Merchandise Trade

**Through the Ports of
Abu Dhabi Emirate**

January 2017

Date of Release: May 2017

Introduction

This publication presents statistics on the value of non-oil foreign merchandise trade, which entered or exited the territory of the Emirate of Abu Dhabi through the ports of Abu Dhabi (comprising air, sea and road ports) in the year to date (Jan-Jan) and January 2016-2017. It should be noted that foreign trade data presented in this publication do not cover non-oil exports and imports through ports of the other Emirates in the UAE.

The data have been sourced from the Abu Dhabi Department of Finance – Customs Administration, and the scope of the statistics therefore is restricted to the trade flows recorded at ports under the jurisdiction of the Customs Administration. The publication highlights the relative importance of each individual component of imports, non-oil exports and re-exports.

The data are present according to the Broad Economic Categories (BEC), the Harmonized System (HS) chapters and by country for total imports, non-oil exports and re-exports.

The Explanatory Notes section at the end of this publication defines the key terms and technical concepts used in the compilation of non-oil foreign merchandise trade statistics. Readers are encouraged to refer to that section while reading the statistics and information outlined in the publication.

Monthly non-oil foreign merchandise trade, in the year to date (Jan-Jan) and January 2016-2017

The value of non-oil foreign merchandise trade through Abu Dhabi ports increased by 13.6% from AED 16.1 billion in the year to date (Jan-Jan) 2016 to AED 18.3 billion in the same period of 2017. This was mainly a result of a 47.1% increase in imports from AED 9.8 billion to AED 14.3 billion and re-exports to AED 2.4 by 43.1%, while the value of non-oil exports decreased by 67.3% compared with the same period of 2016.

Statistical Tables

Table 1: Non-oil foreign merchandise trade through the ports of the Emirate of Abu Dhabi, (Jan-Jan) and January, 2016-2017

Value in million AED

Foreign trade type	January			Year -to- date (Jan-Jan)		
	2016	2017	Change (%)	2016	2017	Change (%)
Imports	9,753	14,349	47.1	9,753	14,349	47.1
Non-oil exports	4,653	1,522	-67.3	4,653	1,522	-67.3
Re-exports	1,680	2,404	43.1	1,680	2,404	43.1
Total	16,086	18,275	13.6	16,086	18,275	13.6

Explanatory Notes

Glossary

This publication contains certain terms specific to foreign merchandise trade and necessary when analyzing the trade statistics of Abu Dhabi Emirate. They include the following terms:

Merchandise Trade

Foreign Merchandise Trade statistics record goods, which add to or subtract from the stock of material resources of Abu Dhabi by entering or leaving its territory. Throughout this publication, the term merchandise trade statistics refers to trade which moves through the ports of Abu Dhabi only, and do not capture inter-emirate trade activity.

Imports

Imports are goods that enter Abu Dhabi's customs and economic district from various parts of the world, excluding other emirates in the United Arab Emirates, and receive customs clearance. Goods are considered imports regardless of whether they enter the Emirate directly or are retrieved from customs warehouses, temporary entry areas or free zones inside the country. These goods receive customs clearance in order to become part of Abu Dhabi's merchandise balance.

Re-exports

Re-exports represent goods that are imported from abroad, enter Abu Dhabi's customs and economic district and become part of the Emirate's merchandise balance. These goods are then re-exported as they are, without any modification, outside the country.

Non-oil Exports

Non-oil exports include goods that are entirely produced locally or in whose production process local resources are used. Non-oil exports through the ports of Abu Dhabi may include goods that were produced in other Emirates in the United Arab Emirates. Oil is excluded from these goods. These goods leave Abu Dhabi's customs and economic district to the outside world, reducing the Emirate's non-oil merchandise trade deficit.

Classifications

The non-oil foreign merchandise trade statistics are presented in accordance with the two main internationally recommended output classifications: Harmonized System (HS) and Broad Economic Categories (BEC).

If users require statistics by the detailed Harmonized Commodity Description and Coding System (HS), these are available from SCAD on request. The HS is primarily an input classification, and is the basis on which traders record goods with Customs.

Data source

Data are obtained from Department of Finance – Customs Administration. The data are processed and passed to Statistic Centre – Abu Dhabi for further editing, compilation and reclassified according to statistical classifications for foreign trade.

Valuation

In line with the World Customs Organization (WCO) agreement on valuation:

- Exports (including re-exports) are valued free on board (fob), which represents the value at the export border, and includes inland freight costs and packaging
- Imports are valued on the cost insurance and freight (c.i.f.) basis, which represents the value at the import border, and includes the additional cost of freight and insurance in transporting the goods internationally

Notes on Tables

- Changes (levels and %) in all tables are based on unrounded numbers.
- Relative importance is calculated as the ratio between the value of the sub-group and the total value for all groups, expressed as a percentage.
- Totals in some tables may not add up due to rounding.
- The data for 2017 are preliminary, and may be revised.

Symbols used

'-' nil or rounded to zero

'.' Not applicable

n.e.s. denotes 'not elsewhere specified'
